

Volcanic Ash – T+0 annotated satellite image

Issued 1000 UTC on Fri 10 May 2019

VOLCICE EXERCISE

EEEN41 MSG Dust RGB 10/05/2019 0930 UTC

HIGH CONFIDENCE-
Ash partially discernible on imagery due to some masking by meteorological cloud. However, IMO confirm ground based radar measures plume to 20km..

LOW CONFIDENCE-
PIREP reported VA at FL300 at 10/0900 UTC considered unlikely as not seen in satellite imagery, and outside of expected plume trajectory.
